Subject: Labadie Power Plant Emissions

My family of 5 has lived in Labadie for the past 15 years and it has come to our attention that the Labadie plant's SO2 emissions are substantially higher than is considered acceptable for human health.

We are asking the EPA to enforce the law (Clean Air Act) and designate that area a non-attainment area. Please do not allow Ameren to continue manipulating MODNR and EPA with inaccurate and insufficient data.

We live and work in the Labadie area. Our 3 girls attended Labadie Elementary under this cloud of contamination. We want Ameren to create a clean-up plan.

Please let me know what your plan is to address this threat to public health.

Sincerely,
Leisa Rotramel
